SUMMARY

Multi-skilled software developer and fresh graduate with a Diploma in Information Technology (Software Development) from Singapore Polytechnic. Practical experience across full-stack web development, REST API integration, RPA automation, and data analytics. Quick to learn, dependable, and happy to put in extra effort when a project needs it.

EDUCATION

Singapore Polytechnic

Apr 2023 — Apr 2026

Diploma in Information Technology (Software Development)

Singapore

- Cumulative GPA: 3.60 / 4.00
- Elective specialisation: Data & Analytics (awarded Certificate in Data & Analytics)

EXPERIENCE

PSA Corporation Ltd

Apr 2025 — Feb 2026

RPA Developer Intern

Singapore

- Built a Power Automate flow that reads 1,000+ row SharePoint Excel datasets, navigates an internal portal, and submits each record via the system's REST API — eliminating manual data entry.
- Implemented error handling and result logging: each row is written back to the source Excel with success/failure status for a full audit trail, with Outlook alerts when unrecoverable errors halt a run.
- Maintained and troubleshooted the existing RPAs.
- Developed a UiPath bot that scans a SharePoint certificate register, calculates days to expiry, and emails renewal reminders before certificates lapse.
- User-tested a new internal system across edge cases — invalid input, timeouts, and operational scenarios such as public holiday handling (e.g. unstuffing times shifting to the next working day's office hours) — and documented defects against expected REST API responses.
- Provided Level 1 helpdesk support, resolving 3–5 issues daily: rollback requests for wrongly entered warehouse data, request timeouts, and cross-portal data inconsistencies where one system updated but the other API failed to fetch.
- Owned meeting minutes and follow-up emails, keeping action items tracked and stakeholders informed.
- Prepared and submitted a slide deck for an in-house AI-powered palletisation tool built by seniors — covering PSA operations background, problem statement, and a KPI comparison against enterprise alternatives. The deck was awarded an Innovation Idea Award.

SKILLS

Languages: JavaScript, Python, Java, SQL, HTML, CSS

Frameworks & Libraries: React, Node.js, Express, Bootstrap, NumPy, Pandas

Databases: MySQL, PostgreSQL (NeonDB), MongoDB (basic)

Cloud & Hosting: AWS (Lambda, API Gateway, Bedrock), Render, Vercel, Git, CI/CD

RPA & Automation: UiPath, Power Automate, SharePoint

Data & Analytics: Power BI, Excel, Data Analysis

Practices: REST API design & integration, Agile / Scrum, Secure Coding (OWASP Top 10), UI/UX Design

PROJECTS

Sar Kyi Tite — Library Management System

React, Node.js, Express, MongoDB, JWT, Nodemailer

Full-stack library system with user authentication and session timeout, book borrowing/return tracking, bookmarks, automated overdue email warnings, and a request system where users submit book requests and admins reply. Admin panel provides full control over users, books, and borrow records. Deployed on Render and Vercel.

Shrtner — URL Shortener

Node.js, Express, PostgreSQL (NeonDB), HTML, CSS, JavaScript

Lightweight URL shortener that generates 3-character codes and scales to 4 on collision, with support for custom aliases and link management. Terminal-aesthetic static frontend backed by serverless PostgreSQL.

AWS Bedrock Chatbot

Python, AWS Lambda, API Gateway, AWS Bedrock (Amazon Nova Lite 2), AWS Guardrails

Serverless ChatGPT-style chatbot powered by Amazon Nova Lite 2 via AWS Bedrock. Python Lambda backend exposed through API Gateway, with 500-token response caps for cost control and AWS Guardrails to block harmful queries before they reach the model.

FOP2 — University Info System

Node.js, Express, REST API, Bootstrap, HTML, CSS, JavaScript

University information system built for the Fundamentals of Programming 2 coursework — a small Express-backed web app exposing REST endpoints behind a Bootstrap UI.
