

HTET MYARK AUNG

Software Engineer

htetmyark@gmail.com | Singapore | +65 9850 8393 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Fresh IT graduate from Singapore Polytechnic (Diploma in Information Technology, Software Development) with full-stack development experience across React and Node.js, hands-on cloud experience on AWS (Lambda, API Gateway, Bedrock, Guardrails, IAM), and networking/systems fundamentals (TCP/IP, DNS, DHCP, VLANs, firewalls, routing) plus Docker & Kubernetes fundamentals from diploma coursework and labs. AWS Certified Cloud Practitioner and AWS Certified AI Practitioner. 10 months of experience as an RPA Developer Intern in PSA Corporation's Digitalization Solutions department, a hybrid IT and business operations function, building automated data pipelines, error-handling/audit-logging architecture, and REST API-triggered workflows for a live enterprise system, plus day-to-day incident diagnostics and Level 1 support. Comfortable working across the stack from architecture to deployment, with hands-on exposure to REST APIs, workflow automation, Git-based version control, Python scripting, and SQL/relational databases. A proactive, documentation-minded fast learner adaptable across software engineering, cloud, DevOps, and infrastructure-focused roles.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, SQL, HTML, CSS

Frameworks & Libraries: React, Node.js, Express, Three.js, WebSockets, Bootstrap, NumPy, Pandas

Cloud, AI & DevOps: AWS (Lambda, API Gateway, Bedrock, Guardrails, IAM), Azure AI Foundry (GitHub Models), Gemini API, MCP, Vercel, Render, Git, CI/CD pipelines, Docker & Kubernetes (fundamentals – SP coursework/labs)

Networking & Systems Fundamentals: TCP/IP, DNS, DHCP, VLANs, firewalls, routing (SP coursework/labs); Linux/Unix command-line

Databases: PostgreSQL, MySQL, MongoDB

Automation & Workflow: Power Automate, UiPath, REST API-triggered workflows, error-handling and audit logging

Testing & Collaboration Tools: Jira, Katalon Studio, Postman, Selenium

Methodologies: REST API Design, Agile / Scrum, Secure Coding (OWASP Top 10)

PRODUCTION SYSTEMS & TECHNICAL PROJECTS

AWS Bedrock AI Chatbot

Python, AWS Lambda, API Gateway, Bedrock (Amazon Nova Lite 2), Guardrails

- Designed and deployed a serverless chatbot architecture exposing Python-backed Lambda functions through API Gateway.
- Integrated AWS Guardrails to filter harmful queries and implemented token-cap controls to manage runtime compute cost, an early version of the eval and reliability gates cloud/AI roles call for.

EduPlayground – AI Learning and Entertainment World

React, Vite, Three.js, Node.js, Express, WebSockets, Azure AI Foundry (GitHub Models), MCP

- Built and deployed a full-stack platform across two cloud services — Vercel (frontend) and Render (persistent WebSocket backend) — managing environment configuration and deployment across both.
- Built a real-time multiplayer feature over WebSockets with server-authoritative state and disconnect handling; shipped an MCP server exposing four tools to GitHub Copilot Chat in VS Code.
- Submitted solo to the Microsoft Agents League @ AISF 2026 hackathon, delivering a fully working, deployed, multi-feature product end to end.

Sar Kyi Tite Library Management System

React, Node.js, Express, MongoDB, JWT, Nodemailer, Render, Vercel

- Built and deployed a full-stack web application with secure JWT authentication, session timeout handling, and automated overdue-notice emails, live on Render and Vercel.
- Built an administrative dashboard with CRUD controls over user records, transaction logs, and inventory, used to manage the full library workflow end to end.

Shrtner – URL Shortening Service

Node.js, Express, PostgreSQL (NeonDB), HTML, CSS, JavaScript

- Built and deployed a lightweight microservice generating unique, collision-resistant URL aliases, backed by a serverless PostgreSQL database layer for high-availability routing.

RAG Chatbot (Portfolio)

Gemini API, Retrieval-Augmented Generation

- Built and shipped a RAG-based chatbot embedded in a live portfolio site, handling retrieval, prompt construction, and response generation against the Gemini API.

PROFESSIONAL EXPERIENCE

RPA Developer Intern | PSA Corporation Ltd

Apr 2025 – Feb 2026 | Singapore

Digitalization Solutions department (hybrid IT and business operations function)

- Prepared and presented a benchmarking proposal for a senior-built, AI-powered palletization tool, comparing it against enterprise alternatives including MaxLoad Pro and SkuSavvy; awarded the regional In-House Innovation Idea Award.
- Engineered a high-throughput data pipeline using Power Automate to process 1,000+ row datasets, ingesting records via native REST APIs and eliminating manual data entry in production.
- Designed an error-handling and audit architecture logging real-time transaction statuses back to source data and triggering automated alerts on unrecoverable runtime failures, directly relevant to monitoring and failure handling for agent and infrastructure workflows.
- Executed rigorous edge-case and boundary testing on a new internal core system, identifying, documenting, and resolving REST API defects.
- Provided Level 1 diagnostics for 3-5 critical tickets daily, resolving cross-portal data synchronization failures and orchestrating backend data rollbacks, a version-control-adjacent discipline.

EDUCATION & CERTIFICATIONS

Singapore Polytechnic

Apr 2023 – Apr 2026

Diploma in Information Technology (Software Development)

GPA: 3.60 / 4.00

Elective Modules: Certificate in Data & Analytics

Certifications

- AWS Certified AI Practitioner
- AWS Certified Cloud Practitioner
- Google AI Professional Certificate
- AI Ethics & Governance (Singapore Computer Society)

LANGUAGES

- English (Professional Working Proficiency)
- Burmese (Native)
- Rakhine (Native)
