PROFESSIONAL SUMMARY

Performance-driven Software Developer and Singapore Polytechnic IT graduate with hands-on experience spanning full-stack web development, serverless cloud architecture, and enterprise automation. Proven track record of optimizing data workflows and building scalable REST API integrations, highlighted by an Innovation Idea Award during an internship at PSA Corporation.

TECHNICAL SKILLS

- **Languages:** JavaScript, Python, Java, SQL, HTML, CSS
- **Frameworks & Libraries:** React, Node.js, Express, Bootstrap, NumPy, Pandas
- **Cloud & DevOps:** AWS (Lambda, API Gateway, Bedrock, Guardrails), Vercel, Render, Git, CI/CD pipelines
- **Databases:** PostgreSQL, MySQL, MongoDB
- **Automation & Analytics:** Power Automate, UiPath, SharePoint, Power BI, Advanced Excel
- **Methodologies:** REST API Design, Agile / Scrum, Secure Coding (OWASP Top 10), UI/UX Design

PROFESSIONAL EXPERIENCE

PSA Corporation Ltd (RPA Developer Intern)

Singapore (April 2025 – February 2026)

- Awarded the In-House Innovation Idea Award for preparing and presenting a comprehensive technical and KPI proposal for a senior-built, AI-powered palletization tool, benchmarking it successfully against enterprise alternatives.
- Engineered a high-throughput data pipeline using Power Automate to process 1,000+ row SharePoint Excel datasets, programmatically navigating internal systems to ingest records via native REST APIs, eliminating manual data entry.
- Designed a robust error-handling and audit architecture that logs real-time transaction statuses directly back to source datasets and triggers automated Outlook alerts for unrecoverable runtime halts.
- Developed an automated monitoring agent using UiPath to parse SharePoint registry data, calculate time-to-expiry dynamically, and manage automated lifecycle alerts.
- Executed rigorous edge-case and boundary testing on a new internal core system, identifying, documenting, and resolving REST API defects relating to request timeouts, invalid inputs, and holiday-shifted operational hours.
- Provided Level 1 engineering support, diagnostics, and resolutions for 3–5 critical tickets daily, resolving cross-portal data synchronization failures and orchestrating backend data rollbacks.

TECHNICAL PROJECTS

Sar Kyi Tite Library Management System | *React, Node.js, Express, MongoDB, JWT, Nodemailer, Render, Vercel*

- Developed a full-stack web application featuring secure JWT user authentication, dynamic session timeout handling, and automated overdue email systems.
- Engineered an administrative dashboard providing granular CRUD controls over user records, transaction logs, and inventory management.

AWS Bedrock AI Chatbot | *Python, AWS Lambda, API Gateway, AWS Bedrock (Amazon Nova Lite 2), AWS Guardrails*

- Built a serverless, ChatGPT-style chatbot architecture exposing Python-backed Lambda functions through AWS API Gateway.
- Integrated AWS Guardrails to intercept and filter harmful queries, implementing token-cap controls to manage runtime compute costs.

Shrtner – URL Shortening Service | *Node.js, Express, PostgreSQL (NeonDB), HTML, CSS, JavaScript*

- Built a lightweight microservice that dynamically generates unique, collision-resistant 3-to-4-character URL aliases.
- Backed a terminal-aesthetic static frontend with a serverless PostgreSQL database layer for high-availability routing.

Fundamental of Programming 2 Assignment | *Node.js, Express, REST API, Bootstrap, HTML, CSS*

- Designed and built an Express-backed web portal exposing clean REST endpoints to manage and serve institutional data sets.

EDUCATION

Singapore Polytechnic

Diploma in Information Technology

(Software Development)

Singapore

Apr 2023 – Apr 2026

- **Academic Standing:** Cumulative GPA: 3.60 / 4.00
- **Elective Modules:** Certificate in Data & Analytics

CERTIFICATIONS

- Certificate in Data & Analytics (Singapore Polytechnic)
- Google AI Professional Certificate (Coursera)
- Google AI Essentials (Coursera)
- AI Ethics & Governance (Associate Level – Singapore Computer Society)
- Certificate in Teamwork (Singapore Polytechnic)
- Manual Testing by TestMu AI (formerly LambdaTest)

LANGUAGES

- English (Professional Working Proficiency)
- Burmese (Native)
- Rakhine (Native)
