

HTET MYARK AUNG

Software Engineer

htetmyark@gmail.com | Singapore | +65 9850 8393 | [LinkedIn](#) | [Portfolio](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Fresh IT graduate from Singapore Polytechnic (Diploma in Information Technology, Software Development) with full-stack development experience across React and Node.js, and 10 months of experience as an RPA Developer Intern in PSA Corporation's Digitalization Solutions department, a hybrid IT and business operations function. Comfortable working across the stack from architecture to deployment, with hands-on exposure to REST APIs, workflow automation, and error-handling and audit logging built for a live enterprise system. AWS Certified Cloud Practitioner and AWS Certified AI Practitioner.

TECHNICAL SKILLS

Languages: JavaScript, Python, Java, SQL, HTML, CSS

Frameworks & Libraries: React, Node.js, Express, Three.js, WebSockets, Bootstrap, NumPy, Pandas

Cloud, AI & DevOps: AWS (Lambda, API Gateway, Bedrock, Guardrails), Azure AI Foundry (GitHub Models), Gemini API, MCP, Vercel, Render, Git, CI/CD pipelines

Databases: PostgreSQL, MySQL, MongoDB

Automation & Workflow: Power Automate, UiPath, REST API-triggered workflows, error-handling and audit logging

Testing & Collaboration Tools: Jira, Katalon Studio, Postman, Selenium, Slack

Methodologies: REST API Design, Agile / Scrum, Secure Coding (OWASP Top 10)

PRODUCTION SYSTEMS & TECHNICAL PROJECTS

EduPlayground - AI Learning And Entertainment World

React, Vite, Three.js, Node.js, Express, WebSockets, Azure AI Foundry (GitHub Models), MCP

- Built a full-stack, gamified AI learning platform with an explorable 3D island (React, Vite, Three.js/react-three-fiber) and a Node.js/Express backend, deployed across Vercel (frontend) and Render (persistent WebSocket backend).
- Integrated Microsoft Foundry IQ (Azure AI Foundry via GitHub Models, gpt-4o-mini text and vision) across five AI features, including a movie-recap generator and a two-call story generation pipeline for reliable output length.
- Built a real-time multiplayer word battle over WebSockets with server-authoritative game state and disconnect handling and shipped an MCP server exposing four tools to GitHub Copilot Chat in VS Code.
- Submitted solo to the Microsoft Agents League @ AISF 2026 hackathon (Battle #1: Creative Apps with GitHub Copilot); did not place, but delivered a fully working, deployed, multi-feature product end to end.

Sar Kyi Tite Library Management System

React, Node.js, Express, MongoDB, JWT, Nodemailer, Render, Vercel

- Built and deployed a full-stack web application with secure JWT authentication, dynamic session timeout handling, and automated overdue-notice emails, live on Render and Vercel.
- Built an administrative dashboard with CRUD controls over user records, transaction logs, and inventory, used to manage the full library workflow end to end.

AWS Bedrock AI Chatbot

Python, AWS Lambda, API Gateway, Bedrock (Amazon Nova Lite 2), Guardrails

- Designed and deployed a serverless chatbot architecture exposing Python-backed Lambda functions through API Gateway.
- Integrated AWS Guardrails to filter harmful queries and implemented token-cap controls to manage runtime compute cost, an early version of the eval and reliability gates this role calls for.

RAG Chatbot (Portfolio)

Gemini API, Retrieval-Augmented Generation

- Built and shipped a RAG-based chatbot embedded in a live portfolio site, handling retrieval, prompt construction, and response generation against the Gemini API.

Shrtner - URL Shortening Service

Node.js, Express, PostgreSQL (NeonDB), HTML, CSS, JavaScript

- Built and deployed a lightweight microservice that dynamically generates unique, collision-resistant 3-to-4-character URL aliases.
- Backed a terminal-aesthetic static frontend with a serverless PostgreSQL database layer for high-availability routing.

PROFESSIONAL EXPERIENCE

RPA Developer Intern | PSA Corporation Ltd

Apr 2025 - Feb 2026 | Singapore

Digitalization Solutions department (hybrid IT and business operations function)

- Prepared and presented a benchmarking proposal for a senior-built, AI-powered palletization tool, comparing it against enterprise alternatives including MaxLoad Pro and SkuSavvy; awarded the regional In-House Innovation Idea Award.
- Engineered a high-throughput data pipeline using Power Automate to process 1,000+ row datasets, ingesting records via native REST APIs and eliminating manual data entry in production.
- Designed an error-handling and audit architecture logging real-time transaction statuses back to source data and triggering automated alerts on unrecoverable runtime failures, directly relevant to monitoring and failure handling for agent workflows.
- Executed rigorous edge-case and boundary testing on a new internal core system, identifying, documenting, and resolving REST API defects.
- Provided Level 1 diagnostics for 3-5 critical tickets daily, resolving cross-portal data synchronization failures and orchestrating backend data rollbacks, a version-control-adjacent discipline.

EDUCATION & CERTIFICATIONS

Singapore Polytechnic

Apr 2023 - Apr 2026

Diploma in Information Technology (Software Development)

GPA: 3.60 / 4.00

Elective Modules: Certificate in Data & Analytics

Certifications

- AWS Certified AI Practitioner
- AWS Certified Cloud Practitioner
- Google AI Professional Certificate
- AI Ethics & Governance (Singapore Computer Society)
- Manual Testing Certification by TestmuAI

LANGUAGES

- English (Professional Working Proficiency)
- Burmese (Native)
- Rakhine (Native)
